Professor Simon Leedham

Simon Leedham is a Cancer Research UK Clinician Scientist and an Honorary Consultant Gastroenterologist. He works in the Molecular and Population Genetics Laboratory at the Wellcome Trust Centre for Human Genetics together with Professor Ian Tomlinson. His current research focuses on the cell-signaling pathways that control intestinal stem cells and the dysregulation of these pathways in cancer.

Professor Tim Maughan

Tim Maughan is Professor of Clinical Oncology and Clinical Director of the CRUK/MRC Oxford Institute for Radiation Oncology within the Department of Oncology at the University of Oxford. He leads the Clinical Research Programme at the Oxford Institute, aiming to deliver a step change in the effectiveness of radiotherapy through the evaluation of novel scientific approaches derived from the Institute's scientists in hypothesis-driven clinical trials.

Tim leads two personalized medicine research programmes: the MRC FOCUS4 trial of molecular selection of therapy in metastatic colorectal cancer and the MRC stratified medicine consortium in colorectal cancer (S:CORT).

Professor Anna Middleton

Anna Middleton is the Head of Society and Ethics Research at the Wellcome Trust Sanger Institute at Cambridge.

She joined the Health, Medicine and Society Group at University of Cambridge in 2016.

Prof Middleton is the creator of the 'GenomEthics' study; she led on the design of a quantitative and qualitative research project to gather empirical data on the feedback of genomic findings from whole genome research studies. More specifically, it is asking 'what to do with Incidental Findings from genome research?' She collaborates closely with Prof Mike Parker, (Director of Ethox, Oxford). She has made a contribution nationally and internationally as an expert in genetic counselling and ethics/genomics issues. She was invited to be chair of the Association of Genetic Nurses and Counsellors working group to create and publish a position paper on opportunistic genomic screening on behalf of British genetic counsellors; Board
